Miniature Rocker Switches

Dust Proof

RoHS Compliant

Introduction

All of the **EL** Miniature Rocker Switch models that conform to the Electrical Appliances and Material Safety Act have acquired the type approval. The housing is made of self-extinguishing phenol resin (**UL94V-0**), which has excellent heat resistance, arc resistance, and tracking resistance performance. In addition, the switches are designed to prevent insulation deterioration caused by arcing thanks to the contact structure where chattering and bouncing time is reduced as much as possible. Furthermore, the **ELE** type, which features the dustproof structure, is best suited for use in a dusty environment.
